

# PERFORMANCE MANAGEMENT SIMPLIFIED

Leveraging AI, facilitate more efficient and accurate employee performance reviews that benefit your entire organization.

## WHAT WE DO

### SEAMLESS ONBOARDING

Set up your organization and grant permissions so your teams can start writing/collecting feedback and generating performance reviews.

### QUICK CAPTURE

With our mobile app, we make it easy to quickly capture short notes of feedback in live time. Feedback is automatically time stamped and aggregated.

### ON-DEMAND REPORTING

Tell our model the timeframe and it analyzes all of the short notes of feedback to write a full performance review.

### PERFORMANCE TRACKING

By storing all feedback and generated reviews, you can have our model compare an employees performance between different timeframes.

## DELIVER VALUE NOT A BURDEN

- Remove recency bias that comes with the typical Annual Performance Review
- Alleviate the time consumption of writing reviews, digging through old emails/notes and analyzing what they say
